

WINDOW INSTALLATION WITHOUT COMPROMISE

Introducing Pella® Steady Set™ Interior Installation System

The industry's first interior installation system for new construction wood windows, is a revolutionary way to install.¹ It's the industry's fastest, most labor efficient wood window installation system with uncompromising quality.² The patent-pending Pella Steady Set interior installation system enables up to 64% of the work to happen from the interior.³

- **Quality without compromise²**
Pella Steady Set features easy-to-learn pre-attached components to help ensure a high-quality, repeatable and reliable window installation. With more confidence of a quality install every time, you can reduce the need to re-visit jobs.
- **3.15x faster than standard fin installation⁴**
Depending on window configuration and size, it's possible to install select single-punched openings solo, taking a 2-person install down to 1.⁵ No shimming is necessary if the unit is level and square, you can attach without shimming, saving time on each install.
- **A safer way to install⁵**
Reduce your exposure to the risks associated with ladder work, heavy units, and bad weather installs. Pella Steady Set allows you to carry, unwrap, set and secure windows in the opening from the interior, reducing overall ladder work by up to 74%.⁵

Pella's Steady Set innovation is totally changing the industry standard for window installation. The results are simple: superior installation, faster install time and safer!

¹ Based on comparing leading window manufacturer's published installation instructions for new construction windows with factory applied installation methods. Additional steps such as flashing and weatherproofing may need to be completed from the exterior. ² Comparing average install time and plumb/level/square measurements of leading national wood window brands when installed following the manufacturer's standard installation methods for new construction windows. ³ When installing standard size window (29x59) into 2nd story application. ⁴ Compared to the average of the leading national wood window brands installation methods for new construction windows when installing standard size window (29x59) into 2nd story application. ⁵ Compared to leading national wood window brands recommended installation methods for new construction windows. ⁶ Compared to leading national wood window brands installation methods when installing average size window (29x59). Larger size Steady Set windows may require 2nd person for lifting window into rough opening. ⁷ Based on comparing written limited warranties of leading national wood window and wood patio door brands. See Pella written Limited Warranty for details, including exceptions and limitations, at pella.com/warranty or contact Pella Customer Service at 877-473-5527.

Pella® Steady Set™

An Easy-to-Learn Interior Installation System

Head Stabilizer

- Engages with the header of the rough opening to help temporarily stabilize the unit
- Helps eliminate the need for someone to hold the unit from falling inwards prior to fastening
- Frees up a secondary installer to move on to other work

Flashing Fin with Continuous Corners

- Pop-up yellow exterior fin is easily deployed and flashed in a simple-2-step process helping to ensure an exterior water barrier
- Features a flexible hinge that naturally adapts to variation within the wall and an integrated corner seal allowing for a continuous seal
- Bottom fin includes a textured surface to assist with water management

Shim Guide

- Located on the jambs of select units
- Assists the installer by helping to hold shims in the correct location
- Can help ensure consistent frame to sash reveals

Flip & Click Installation Bracket

- Comes pre-attached to the unit and helps enable a reliable, safe and simple install
- Simply needs to be unclipped, flipped and cicked to be install ready
- This structural attachment method securely attaches the window to the rough opening and accommodates most wall construction depths

Sill Shim

- Pre-applied sill shims raise the unit 1/4" off the rough opening sill, ensuring space for foam and/or sealant
- Gap also allows for installers to easily insert tools to manipulate the unit
- Limits pinched fingers and product damage when leveling
