

EXTERIOR WOOD CLEANER

Rubio® Monocoat Exterior Wood Cleaner is a preparatory product used to clean wooden patios, fences, exterior doors, carports, etc...prior to being finished with a Rubio® Monocoat exterior finish product. The product **removes grey discoloration, green deposits and dirt.**
Please reference the TDS before using

EXTERIOR SOAP

Rubio® Monocoat Exterior Soap is a soap with a **cleaning and nourishing** action. This product is used to clean external wooden surfaces, which have been treated with a Rubio® Monocoat exterior oil.
Please reference the TDS before using

COLOR EFFECTS AND MAINTENANCE SOLUTIONS

Unique Characteristics

- › 0% VOC
- › Reduces the solid content without changing the viscosity
- › Extends the drying time
 - Easier to work with in hot conditions
 - Reduces risk of overlaps
- › Easier spreadability on rough and porous species
- › Reduces layer build-up during maintenance or when 2-layers are applied.
- › Create an instant aged look by diluting a color from the Grey Collection

WOODCREAM SOFTENER

Rubio® WoodCream Softener is a product that allows you to decrease the color intensity of the Rubio® WoodCream colors and **create a more transparent or aged effect.** Rubio® WoodCream Softener is also used as a **mix-in when performing a maintenance application** of Rubio® WoodCream.

WHICH PRODUCT SHOULD I CHOOSE?

RUBIO® MONOCOAT HYBRID WOOD PROTECTOR

- › Oil
- › Molecular bonding
- › Transparent color look
- › Wood warming effect
- › On vertical and horizontal* wood
- › Monocoat: colors and protects in one single layer
- › Apply and wipe off traces of excess product
- › Apply to raw wood

vs

RUBIO® WOODCREAM

- › Wax-based cream
- › Nourishing cream technology
- › Opaque color look
- › No wood warming effect
- › On vertical wood
- › Colors and protects in one or more layers
- › Easy to apply with a brush
- › Apply to raw wood or over existing finish with some prep

*Add 10% Part B (Accelerator) to Hybrid Wood Protector when applied to horizontal surfaces.

Rubio® MONOCOAT

YOUR PARTNER IN WOOD PROTECTION

MUYLLE FACON

A PASSION FOR WOOD TREATMENT SINCE 1962

Muylle Facon was founded in 1906 as a manufacturer of high-quality putty and is now an important producer of waterproof products, coatings and sealers, impermeable and impervious to water, and other specialties for buildings.

It's first range of wood treatment products was launched in 1962:

Teintécire: Waterbased colorstain with warm colors, which provides a nice gloss and antique look.

Ciraneuf: Liquid or solid beeswax, turpentine based.

Boizaneuf: Paint remover.

The close collaboration between the laboratory, the sales-team and the applicators has resulted in the development of the unique Rubio® Monocoat range.

*Based on test method CMA/3/E

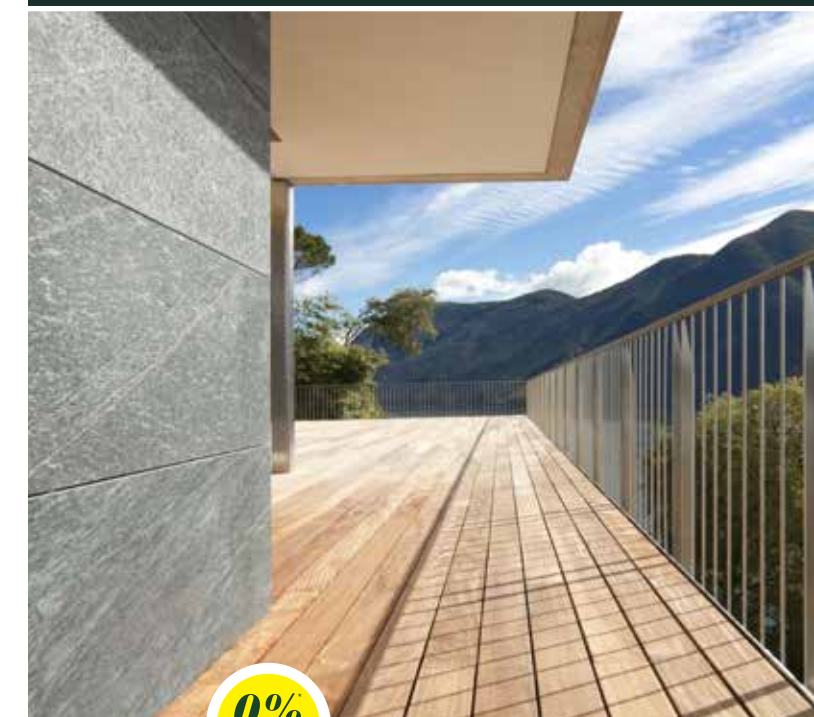

Rubio is a Registered Trademark of Muylle-Facon.

RUBIO® MONOCOAT EXTERIOR

GREEN TECHNOLOGY, APPROVED BY NATURE!

**DURABLE AND DECORATIVE
OIL FOR EXTERIOR WOOD**

RUBIO® MONOCOAT HYBRID WOOD PROTECTOR

Rubio® Monocoat Hybrid Wood Protector is a genuine 'monocoat', suitable for coloring and protecting almost all exterior wood in **1 single layer**. The exterior oil finish protects wooden decks, patios, façades, doors, shutters, carports, garden furniture, gazebos, pergolas, etc. from **discoloration and weathering**. The **easy application and maintenance** make this oil an exceptionally user-friendly product.

MOLECULAR BONDING

Rubio® Monocoat oil adheres, within just a couple of minutes, to the topmost fibers of the wood through a revolutionary **molecular bonding technology**. This provides a **durable finish** that keeps the woods **natural look and feel**. As there are no layers built up, the finish **does not peel or flake!**

GREEN

Rubio® Monocoat Hybrid Wood Protector is **plant based!** It **does not contain water, formaldehyde, or Volatile Organic Compounds (VOCs)!** This ensures a product safe for the person applying it and safe for the environment!

EFFICIENT

With one liter of Rubio® Monocoat Hybrid Wood Protector, you can treat up to **300 ft.²** of decking wood. Due to its molecular bonding with the topmost fibers of the wood, there's **no need for a second coat**. Extra drying time and sanding between coats are things of the past!

EASY

Have we mentioned **1 single layer**?! Thanks again to the revolutionary molecular bonding technology, Rubio® Monocoat Hybrid Wood Protector **will not overlap** or show starting marks. Additionally, future maintenance including **refreshment of color and protection is done using the same product**, with no need for sanding!

UV STABILIZERS

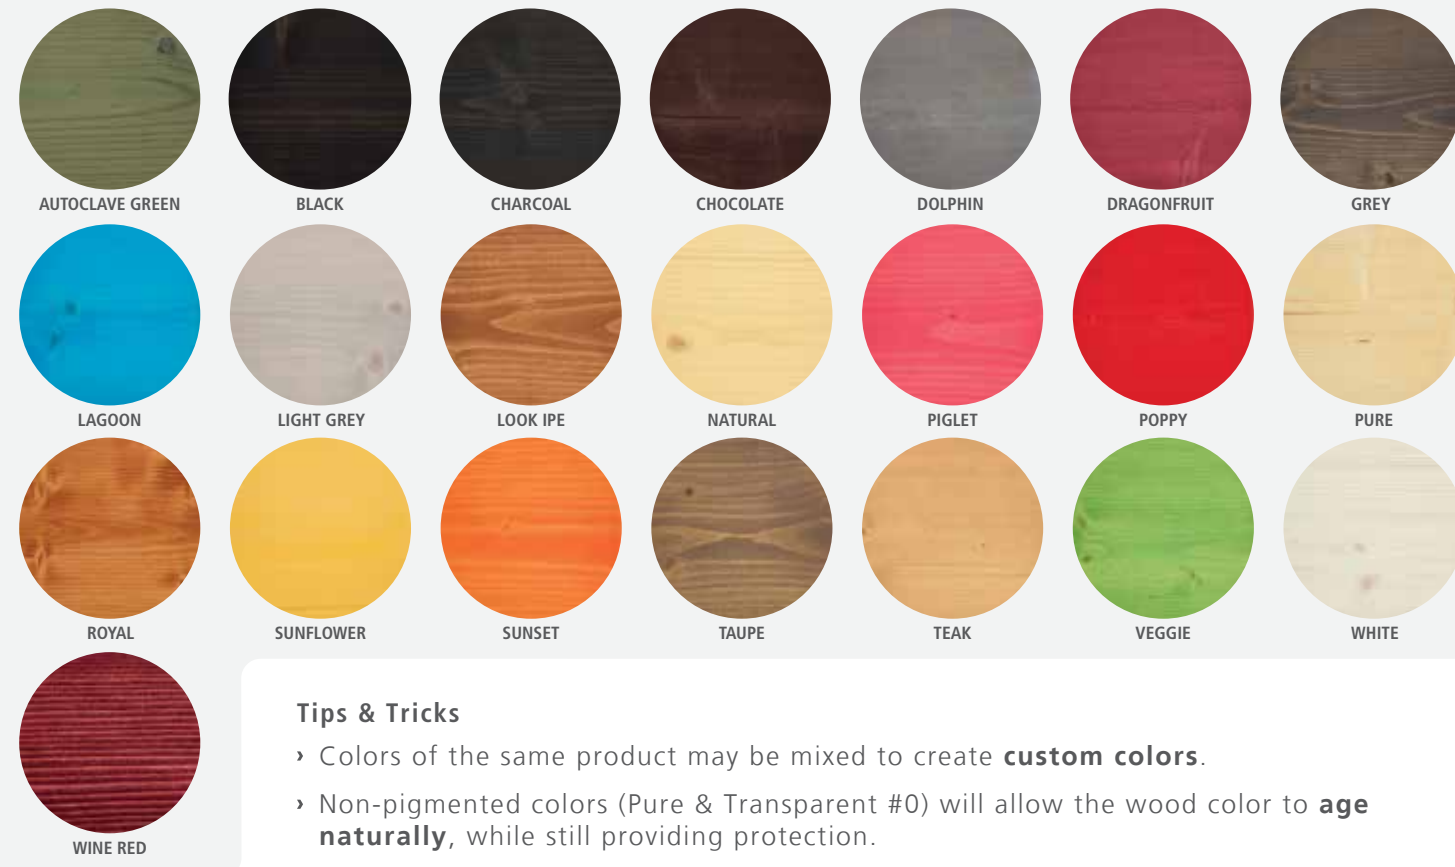

Combat the powerful UV rays put off by the sun with **UV stabilizers**. UV stabilizers come in the form of colorfast pigments, which help to stabilize the surface of your exterior wood against UV exposure.
**Pure - Does not contain UV Stabilizers. It will allow wood to turn grey.
 White - Will become brighter when exposed to UV. On non-UV exposure, the white will become off-white.

Hybrid Wood Protector

SHOWN ON PINE

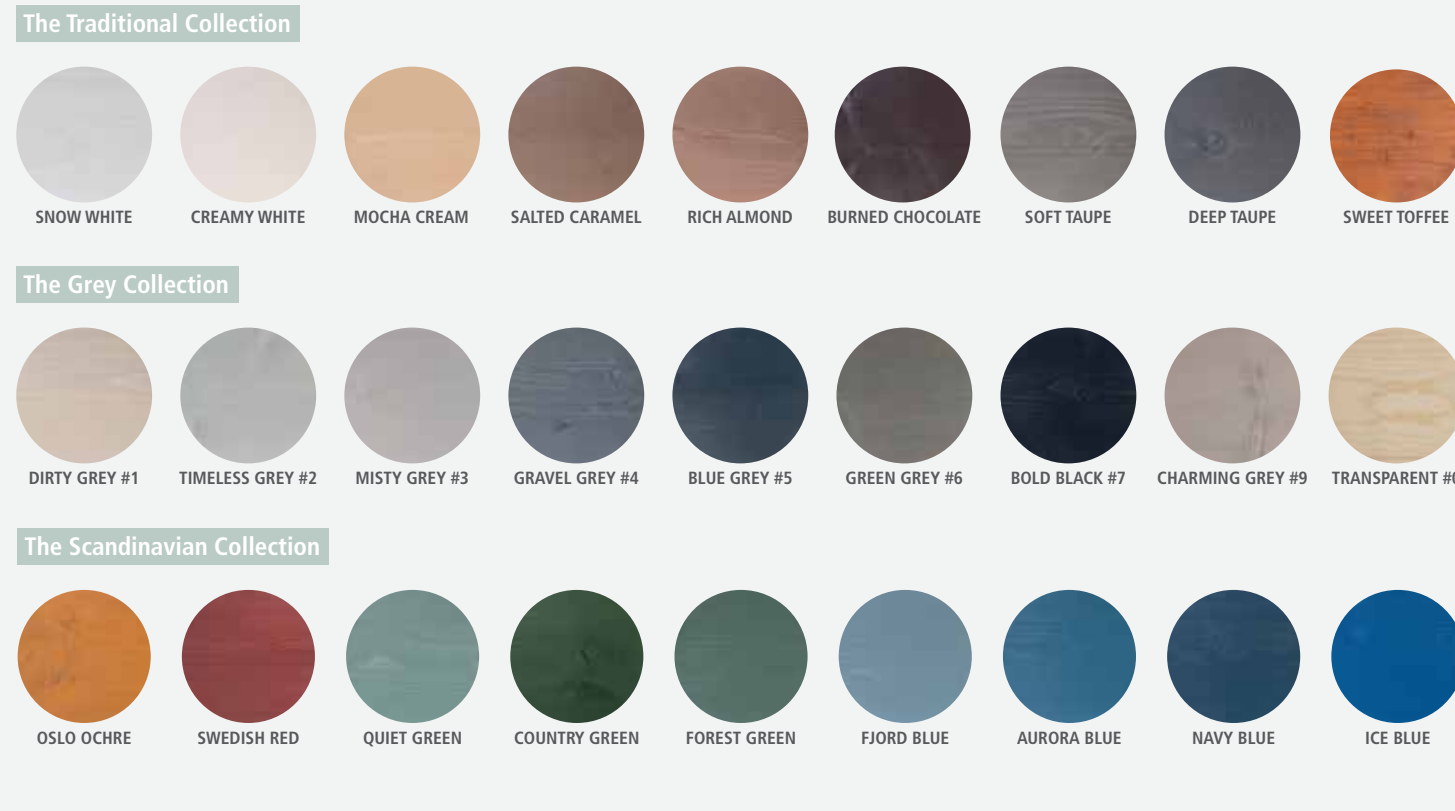

Tips & Tricks

- › Colors of the same product may be mixed to create **custom colors**.
- › Non-pigmented colors (Pure & Transparent #0) will allow the wood color to **age naturally**, while still providing protection.

**PROTECTING THE NATURAL
BEAUTY OF WOOD**

RUBIO® WOODCREAM

Outdoors, it's vital to treat wooden surfaces with the right product. After all, you want the wood to look good for a long time. **Rubio® WoodCream** is based on **hydrophobic technology** especially developed for maximum wood protection. Its unique and active **self-cleaning** formula intensely nourishes the wood, preserves the **breathable** structure, and makes it **water-repellent**. The beauty of it all: the wax cream comes in a wide range of colors and brushes smoothly. A joy to work with and a feast for the eyes!

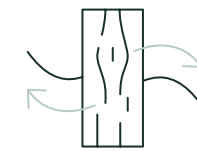

WAX-BASED CREAM

The **cream structure** of Rubio® WoodCream not only guarantees **ease of application**, but it also ensures a long contact time with the wood. This gives the wood time to optimally absorb Rubio® WoodCream, without masking the existing texture. Rubio® WoodCream can be applied in one layer, or for a more opaque result, in two layers, without changing these unique properties. The unique structure also guarantees **very low consumption**.

NOURISHING

Rubio® WoodCream not only colors and protects the wood, but also nourishes it. The cream penetrates deep into the wood and ensures that the surface remains **vapor permeable**. The cream **doesn't contain fillers** and doesn't form a sealing layer on the wood as other paint products and lacquers do. Rubio® WoodCream **will not flake off** and therefore guarantees a **much longer lifespan** of the wood.

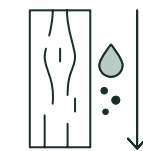

BREATHABLE

Wood must be able to breathe to maintain its beauty. Our hydrophobic cream ensures that the **wood pores remain open** and **moisture regulation is retained**. As a result, water is repelled, and air and trapped water vapor can still pass through. The **natural look & feel** of the wood is also preserved.

WATER-REPELLENT

The capillary force of the wood fibers, the force that attracts water, is converted into a water-repellent force because of the hydrophobic character of Rubio® WoodCream. This results in a **long-lasting water-beading** effect on the wood, which gives the wood a **very durable protection** against extreme weather conditions.

SELF-CLEANING

The water-beading effect provides **protection against water**, and at the same time creates a self-cleaning effect. Water droplets slide off the wood, removing dirt particles from the surface. The water-repellent and self-cleaning effect **reduces the risk of micro-organism growth** (algae, molds, fungi) and prevents frost damage.
