

T-STAR *plus* DRIVE WAFER HEAD HCR-X™ COATING

ENGINEERED FOR USE IN MULTIPLE MATERIALS AND EXTERIOR APPLICATIONS, INCLUDING TREATED LUMBER.

“HCR-X” is tested and recognized for use in untreated and ground contact pressure treated lumber for exterior, freshwater general construction applications (e.g. AWPA UC1-UC4A).

The unique low-profile wafer head is an ideal alternative to flat truss head screws for attaching fixtures and brackets that require a larger surface area for greater hold-down force. T-STAR *plus* drive provides superior bit engagement and virtually eliminates camming out.

New SPAX HCR-X™ Coating System offers superior “X-terior” corrosion resistance when installed in treated lumber and tested in exterior.

(Testing was performed utilizing code-recognized acceptance criteria.)

Patented thread serrations and unique 4CUT™ Point require no pre-drilling, speed installation and help guard against wood splitting.

SPAX Multi-Purpose Exterior Wafer Head Screws are available in a wide selection of sizes and are sold in project-appropriate 1 lb. and 3 lb. package quantities.

- #8 x 1-1/4" #10 x 2-1/2"
- #8 x 1-1/2" #10 x 3"
- #8 x 2"
- #8 x 2-1/2"

EXTERIOR/DECK SCREW WITH HCR-X™ COATING

FOR USE IN PRESSURE-TREATED LUMBER AND EXTERIOR WOOD APPLICATIONS.

The new SPAX® Exterior/Deck Screw is the most versatile exterior wood screw on the market!

"HCR-X" is tested and recognized for use in untreated and ground contact pressure treated lumber for exterior, freshwater general construction applications (e.g. AWPA UC1-UC4A).

APPLICATIONS

- Preservative-treated wood decking
- Deck fascia, trim, railing and balusters
- Fencing
- Trellis
- Pergola shade perlin
- Planter/flower boxes
- Children's play house
- Any exterior wood-to-wood applications

(Not for use with redwood or cedar)

T-STAR *plus* drive provides superior bit engagement to eliminate head stripping/cam outs.

Patented *MULTI-Head* design facilitates flush or countersunk installation in wood.

New SPAX HCR-X™ Coating System offers superior "X-terior" corrosion resistance when installed in treated lumber and tested in exterior. (Testing was performed utilizing code-recognized acceptance criteria.)

Patented thread serrations and unique *4CUT™* Point require no pre-drilling, speed installation and help guard against wood splitting.

SPAX Exterior/Deck Screws are available in a wide selection of sizes and are sold in project-appropriate 1 lb., 3 lb., and 5 lb. package quantities.
