NOTE: Double Reverse Thread - For use in wood or composite (PVC) trim & fascia applications.

MATERIALS AND COATING: Carbon steel coated fasteners including a white or yellow HCR (High Corrosion Resistance) coating system which allows the product to be used in both exterior and interior applications fastening materials such as pressure treated lumber, standard general purpose wood trim products along with composite wood and PVC trim products. SPAX® recommends stainless steel for applications including cedar and redwood substrates.

POWERTRIM® FINISHING TRIM and COMPOSITE (PVC) TRIM HEAD SCREWS

For exterior and interior use in wood, composite wood, or PVC trim and fascia installation.

Trim Head / T-STAR *plus* Drive:
Provides superior bit engagement to eliminate camming out and facilitate single hand, overhead driving plus a flush/clean finish installation.

Patented Thread Serrations:
Dramatically increase installation speed.

(Optional) Double Reverse Thread:
Specifically designed for composite (PVC) installation to pull the pigtail shaving down into the hole.

Unique 4CUT™ Point:
Prevents splitting and requires no pre-drilling.
