**LOW ENVIRONMENTAL IMPACT**  
Sustainable manufacturing & use of raw material

## LOW ENVIRONMENTAL IMPACT

Holistically sustainable manufacturing & use of raw materials

When you choose Eva-Last, you're choosing the best solution for both you and the environment. Eva-Last products are the low-maintenance, reliable alternative to wood that consistently outperform timber and other composite materials. They're also the environmentally friendly material choice that is gentler on the Earth.

### BAMBOO WASTES LESS & PROVIDES MORE

Eva-Last uses bamboo in its composite production. Bamboo can grow up to 50 times faster than timber and releases 35 percent more oxygen into our air than most hardwood trees. It can be made into composite with only 2 percent wastage (compared to over 80 percent wastage with timber) and is naturally antibacterial.

### USE OF RECYCLED PLASTIC

By using recycled waste plastics, in combination with easily replenishable bamboo fiber, we are able to produce a highly durable composite product while saving millions of tons of plastic from entering landfills and oceans. Every year Eva-Last recycles over 26,000 tons of plastic. Recycling one ton of plastic results in carbon dioxide savings of approximately 0.73 tons – the same as traveling nearly 2,500 in a car.

### USE OF SOLAR POWER IN THE MANUFACTURING PROCESS

Traditional manufacturing is an energy-intensive endeavor. That's why Eva-Last took the decision to start moving towards manufacturing using solar energy. Since 2017, 32,858 solar panels, or 88,716 m<sup>2</sup> of solar panels, have been installed. This leads to a saving of 2,000 tons of CO<sub>2</sub> every single day.

Eva-Last has been at the forefront of the green building industry since its inception in 2007. We are dedicated to consistently improving how we serve the environment and our clients. From the recycled and renewable raw ingredients we use to create our products, to the solar power we harness to manufacture, we are proud to offer holistically sustainable building products.

# TECHNOLOGIES

Eva-Last has developed a resilient collection of bamboo composite technologies, each with its own unique characteristics and set of benefits. These versatile materials can be used in a variety of applications such as decking, cladding, screening, fencing, and architectural beams.

## Pioneer

### REINFORCED BAMBOO FOAMED-PVC COMPOSITE

Pioneer offers photorealistic print technology for a remarkable natural look and a glass fiber-reinforced core for increased strength.

*50-Year Residential | 15-Year Commercial Warranty*

## Apex PLUS

### REINFORCED, CAPPED BAMBOO FOAMED-PVC COMPOSITE

The Apex range boasts an exceptionally natural looking dual-tone finish and is also available in reinforced Apex PLUS for increased strength.

*50-Year Residential | 15-Year Commercial Warranty*

## ALTITUDE

For a cooler deck

### COOL TECHNOLOGY, CAPPED BAMBOO COMPOSITE

Altitude composite brings comfort and style to your outdoor space in the form of a cool decking, which boasts the fine look of high-end composite.

*30-Year Residential | 15-Year Commercial Warranty*

## Infinity

### CAPPED BAMBOO COMPOSITE

Infinity composite adds value and good looks to your outdoor space and to your lifestyle by giving you steadfast composite that lasts for decades.

*30-Year Residential | 15-Year Commercial Warranty*

## Eva-tech

### BAMBOO COMPOSITE

Eva-tech is a cost-effective bamboo composite. It offers reliable slip resistance, and is a low-maintenance alternative to timber.

*10-Year Residential*

## REINFORCED BAMBOO FOAMED-PVC COMPOSITE

Pioneer composite brings to market a photorealistic print technology that creates the most natural looking composite finish available in the Eva-Last range. A bamboo foamed-PVC and glass fiber-reinforced core provides increased strength and span capability and reduces expansion and contraction of the PVC. Its advanced wear layer protects against fading, scratches, moisture, and stains.

**Capping material:**  
Print surface finish with protective wear layer

**Core material:**

# Apex

## LIGHTWEIGHT, CAPPED BAMBOO-PVC COMPOSITE

Apex offers you a resilient and natural looking eco-friendly composite. Its ultra-lightweight bamboo foamed-PVC core makes for easy installation and workability. Apex carries both fire and slip resistance ratings, and exceptional low maintenance, requiring only basic cleaning for optimal longevity. Its protective cap is made from a resilient acrylic polymer coating for long-term fade, scratch, and stain resistance.

Transform your outdoor space into a luxurious oasis with Apex lightweight, capped bamboo foamed-PVC composite. Apex invites you to relax in a beautiful outdoor space and enjoy the richness of what Mother Nature has to offer. Bask in the feeling of being completely present, surrounded by better performing, natural looking composite that's gentle on the Earth.

## COST-EFFECTIVE BAMBOO COMPOSITE

Design an outdoor space that's more inspiring and inviting with Eva-tech bamboo composite, the original classic and trusted composite brand by Eva-Last.

**P** PATENTED TECHNOLOGY

### Core & surface material:

Bamboo PE composite

FSC certified bamboo composite product

Eva-tech IS combines all the benefits of Eva-tech with the advantages of I-Series to give you a cost-effective bamboo composite. It offers slip resistance for a safer, more beautiful outdoor space, and is a low-maintenance alternative to timber, offering the look of natural wood without the constant upkeep. Its reliable durability is long-lasting and its decay and weather resistance provides protection from insects and harsh weather. The revolutionary I-beam design creates a lightweight board that uses less material, yet maintains span capabilities, strength, and stiffness for a more efficient installation that requires less substructure and saves on transportation and labour. This improved environmentally friendly composite is holistically sustainable from its manufacturing to its use of raw material.

# BUILDING SYSTEMS

Innovative Eva-Last building systems bring the convenience and longevity of low-maintenance bamboo composite and specialized deck fasteners. Explore and enjoy an inspiring and naturally beautiful range of decay resistant outdoor building products.

## **HULK FASTENERS.**

### RELIABLE DECKING FASTENER SYSTEMS

HULK Fasteners are purposefully designed to make decking installations more efficient, straightforward, and beautiful with their long-term durability, reliable grip, and range of colors to complement the look of your decking of choice.

### ADVANCED BAMBOO COMPOSITE CLADDING

VistaClad bamboo composite cladding breathes vibrancy into your home or outdoor space and enhances your walls with the attractive look of hardwoods.

### ALUMINUM FRAMED HORIZONTAL COMPOSITE FENCING

The Evolver system allows for complete customization by pairing optimized aluminum posts and framing with environmentally friendly bamboo composite for a durable, low-maintenance, modern-looking, and corrosion resistant fence.

### BAMBOO COMPOSITE FENCING

Unlike traditional wood fencing, Oasis requires virtually no maintenance to continue to look as beautiful as it did the first day it was installed. This means no staining, painting, or replacing boards.

### HYBRID ALUMINUM BAMBOO COMPOSITE BEAM

Ultraspan hybrid aluminum composite beams give you the creative freedom to build more memorable outdoor architectural designs.

Featured: **Ultraspan, Savanna**  
Hybrid Aluminum Bamboo Composite Beams

# HULK FASTENERS.

## RELIABLE DECKING FASTENER SYSTEMS

HULK Fasteners are purposefully designed to make composite or timber decking installations more efficient and straightforward by providing highly durable hidden fastener options that fit neatly into the edges of grooved boards, as well as a range of color matching top fixing screws.

## DESIGNED FOR PROFESSIONALS. PERFECT FOR NOVICES.

HULK Fasteners offer higher performance and are a more efficient and subtle way to secure your decking and trim boards without disrupting its final look.

- 1 Chain Collated Clip or S-Series hidden clip system
- 2 Composite Decking Screw (CDS) for timber frames or Metal Decking Screw (MDS) for metal frames
- 3 Composite Trim Screw for timber frames or Metal Trim Screw for metal frames

### HULK Fasteners hidden clips

Eva-Last recommends HULK Fasteners decking clips to provide a reliable long-lasting hold for composite decking boards. Both the Chain hidden clip and S-Series systems by HULK provide a neat and discreet fastening option for a flawless finished surface. Packs and starter kits include a drill bit and one screw per clip.

### HULK composite top fixing screws

Color matching composite decking and trim screws are used for top fixing non-grooved and fascia or deck trim profiles to metal or timber frames, providing an invisible finish.

Collation with screw for timber frames

Collation with screw for metal frames

Collated clip hand tool

### S-SERIES HIDDEN DECK FASTENER

Eva-Last created the S-Series (Halo) clip to match the life expectancy and durability of Eva-Last composite decking materials. This product laid the foundation for the hidden fastener: no more protruding screws, no more ruined finishes, no more untidy aesthetics.

METAL CLIP SCREW

TIMBER CLIP SCREW

For fastening HULK hidden deck clips onto metal or timber frames without having to pre-drill

### S9 CLIP

Use for fastening grooved deck boards with a foot height of approximately 0.354" (9 mm); compatible with metal and timber clip screws

# VistaClad

Cladding inspired by nature

## ADVANCED BAMBOO COMPOSITE CLADDING

The VistaClad lightweight bamboo composite cladding system is revolutionizing how cladding works with an innovative clip strip that locks boards into place using reliable dual spring technology. This low-maintenance, weather-resistant cladding is a smart, cost-effective and a sustainable investment in our planet.

## VISTA CLAD SYSTEM COMPONENTS

The VistaClad system combines Eva-Last composite technologies with an innovative installation process to provide a robust and convenient cladding solution. The resultant hidden fixing generates an unblemished finish and avoids the limitations or inconvenience of fastening through composite.

Composite Cladding Boards

Clip Strips

Adaptors & Trim Profiles

## CUTTING-EDGE SUSTAINABLE CLADDING

VistaClad bamboo composite cladding breathes vibrancy into your home or office space and enhances your walls with the attractive look of natural hardwoods. Let routine maintenance and premature replacement be things of the past as you look to the future with one of the most cutting-edge cladding systems available, complete with complementary trim for a neat and tidy finish.

### CLIP LOCK DESIGN

Boards securely click & lock into place to withstand strong winds

### COMPLETE CLADDING SOLUTION

Innovative system with concealed fastening & trim for a finished look

### LIGHTWEIGHT

Smart system engineered for lighter weight & better airflow

### VENTILATED & INSULATED

Design allows for system ventilation & natural insulation

### LOW-MAINTENANCE

Ideal for large-scale projects & application at height

### DECAY RESISTANT

Resists biodegradation, corrosion, insects, UV, & harsh weather

### COST-EFFECTIVE SYSTEM

Save on fast, simplified installation & overall upkeep

### ECO-FRIENDLY

Sustainable manufacturing & use of raw materials

For more information on VistaClad, please visit [www.eva-last.com/us](http://www.eva-last.com/us)

## THE CLIP STRIP

The VistaClad clip strip uses a punched spring design that allows the cladding boards to be easily and securely clicked into place. Three epoxy-coated, zinc-galvanized strip profile options provide flexibility in application and allow for optimal ventilation and drainage.

**EVOLVER**  
THE EVOLUTION OF FENCING

## ALUMINUM FRAMED BAMBOO COMPOSITE FENCING

The Evolver fence system allows for complete customization by pairing lightweight optimized aluminum posts and framing with environmentally friendly bamboo composite boards for a low-maintenance, modern-looking, and long-lasting corrosion resistant fence.

### ALUMINUM FRAMED HORIZONTAL COMPOSITE FENCE

Evolver aluminum framed composite fencing combines the best of both aluminum and composite fencing into one cool, contemporary solution. Enjoy the rich warmth of composite, coupled with the sleek durability of aluminum. This highly customizable fence stands out while standing up to UV, fading, mold, insects, wind and weather.

# *Infinity* Capped Bamboo Composite Fence Boards

The proprietary manufacturing process used in the creation of Eva-Last Infinity achieves an infinitely variable and authentic color finish, comparable only to natural timber. This advanced and innovative technology allows for incredible color blending and an authentic natural and durable finish for composite fencing.

## FENCE & FRAME COMPONENTS

| Profile Description        | Profile Dimensions                                 | Profile Mass              |

## FENCE GATE

Aluminum framework & accessories are available in black or silver.

## BAMBOO COMPOSITE FENCING

Oasis composite fencing is made from bamboo fibers and recycled plastic for greater insect, moisture, fade, and decay resistance. This low-maintenance fencing option installs easily and is eco-friendly.

## CAREFREE COMPOSITE FENCING

Oasis composite fencing brings privacy and peace of mind to your outdoor oasis. Choose from its natural color range and customizable style options to get the look you want. Enjoy the hassle-free lifestyle it offers thanks to its low-maintenance and weather resistant features. Feel good knowing you've chosen an eco-friendly alternative to traditional wood fencing.

## BOARDS & STYLES

Oasis composite boards can be assembled to suit your preferences, including these styles:

**6' Dog Ear  
Side By Side**

**8' Square Board  
Side By Side With Trim**

**8' Square Board  
Board on Board With Trim**

# ULTRASPAN

COMPOSITE ARCHITECTURAL BEAMS & PERGOLAS

## HYBRID ALUMINUM BAMBOO COMPOSITE BEAM

Ultraspan hybrid aluminum composite beams give you the creative freedom to build more memorable outdoor features, pergolas, screens, and architectural designs.

### HIGH PERFORMANCE FOR HIGH EXPECTATIONS

PERGOLAS

PRIVACY SCREENS

CLADDING & SOFFITS

DECORATIVE ARCHITECTURE

Ultraspan beams add style and functionality in a diverse range of applications. Enjoy the shade and privacy of a pergola or screen, or enhance the appeal of your home exterior with beams that give the look of wood without the maintenance hassles. The versatility of Ultraspan decorative architectural beams is matched only by their beauty.

#### DESIGN VERSATILITY

Architectural beams offer a diverse range of aesthetic applications

#### LIGHTWEIGHT DESIGN

Specialized aluminum core for easier installation at height

#### LOW-MAINTENANCE

The look of timber beams without the upkeep

#### INCREASED SPAN

Reinforced bamboo composite beam with built-in aluminum core

#### DECAY RESISTANT

Resists biodegradation, corrosion, insects, & harsh weather

#### FADE RESISTANT

Built-in UV protection for beautiful durability

For more information on Ultraspan, please visit [www.eva-last.com/us](http://www.eva-last.com/us)

## REINFORCED MODULAR COMPOSITE

Ultraspan architectural beams offer design versatility and increased span thanks to their specialized aluminum core that makes for easier installation at height. The outer coating of low-maintenance bamboo composite resists biodegradation, corrosion, insects, and harsh weather, and offers built-in UV protection for beautiful durability. Enjoy the look of timber beams without the upkeep.

### TRI-EXTRUDED ALUMINUM BAMBOO COMPOSITE

- 1 Aluminum core
- 2 Engineered flexible adhesive
- 3 Outer protective composite coating (Eva-tech surface technology)

## COMPOSITE PROFILES

### End caps

End caps and post caps are available allowing for a neat finish to your Ultraspan composite beams.

RETAIL

HOSPITALITY

TIER Element indoor flooring is designed for versatility as well as durability. TIER Element can be applied to any room in your residential or commercial space. Let the low-maintenance and high-performance features of TIER Element enhance the look and functionality of your home or business.

## TIER FEATURES & BENEFITS

*Take them home.*

### PVC-FREE

Eva-Last® utilizes advanced technology for a more sustainable and better-performing PVC-free composition. Its Recycled Bamboo Polymer Composite (RBPC) core is UFLPA compliant, fully recyclable, and made using solar energy.

### SOUND SUPPRESSION

The composite layers of TIER Element flooring give it impressively efficient sound reduction for all types of noise and make it soft under impact. The high density foam underlay suppresses the transmission of sound into its surroundings.

### NATURAL AESTHETIC

State-of-the-art photorealistic technology creates an exceptionally natural aesthetic. Scans of real wood are used to give each TIER Element color option the authentic look of timber with virtually unrepeatable patterns. Uniquely nuanced, realistic woodgrain textures are 3D printed onto the profiles to further enhance the natural look and feel of your floors.

### HEAT RESISTANT

The core layer of TIER Element can tolerate extremely high temperatures without adverse long-term effects. This means the boards will not behave differently in areas exposed to sunlight compared to those that do not have the same exposure.

### MINIMAL REPEAT PATTERN

The innovative digital and 3D printing technologies used for TIER Element essentially eliminate repeat patterns on the surface of your boards for a more natural finish that boasts the beautiful look of wood in an upgraded material option.

### STABLE

The specially engineered RBPC composition stabilizes each TIER Element board. It will not change shape or size under different temperature conditions and it will not react with typical cleaning chemicals. This stability allows you to install TIER Element flooring without expansion strips on areas up to 1,000 ft<sup>2</sup>, even between adjacent rooms.

### WATER RESISTANT

The materials that comprise TIER Element flooring are highly resistant to moisture. The stability and rigidity of the profiles allow for a watertight, straightforward installation that will prevent spills from seeping beneath your floorboards and, therefore, will avoid swelling or buckling.

### VOC-FREE

TIER Element is VOC-free to make it healthier for you and the environment. By avoiding the use or inclusion of VOCs, glues, phthalates, or plasticizers, TIER Element provides a cleaner and safer flooring option that gives you peace of mind.

## LOW ENVIRONMENTAL IMPACT

Holistically sustainable manufacturing & use of raw materials

# CHOOSE SUSTAINABLE BUILDING MATERIALS

## RENEWABLE RESOURCES & RENEWABLE ENERGY

We believe that how we manufacture is just as important as what we manufacture when it comes to going green. That's why we've traded in fossil fuels for renewable energy. Our products use solar power as part of our manufacturing process. We are fully committed to bringing you a product that's holistically sustainable.

Every Eva-Last outdoor range pairs recycled raw ingredients with bamboo for a stronger, more sustainable composite. Bamboo rejuvenates over 30 times faster than traditional hardwoods and it releases 35% more oxygen into our air. Eva-Last is internationally recognized for our commitment to the environment. We're proud of the work we do to promote environmental sustainability and invite you to choose timber alternatives that are gentle on the Earth.

- Made from recycled materials
- No trees felled
- No treatment or toxic chemicals required for maintenance
- Solar power used in the manufacturing process
- Reduced impact on landfills
- Reduced carbon footprint
