Work with home builders?

Simplify scheduling, project management, and estimating from your mobile device with Bolt.

Bolt helps all mechanical and specialty contractors manage their jobs more efficiently. Our customers include: HVAC, electrical, plumbing, framing, painting, flooring, drywall, insulation, concrete, landscaping, and more!

Scheduling

- Improve how you schedule jobs, reduce back-and-forth trips, and manage more tasks
- Quickly assign work and reschedule jobs
- Receive "job ready" confirmations and eliminate wasted trips to the site
- See the current status or progress of a work order based on the color or icon
- Track time, location, and log specific activity directly to the work assigned to a crew
- Crews and supervisors only see their scheduled work to keep data secure

Project Management Solutions

- Manage job details, and provide detailed accurate reporting
- Keep all specific job documents in one spot so you can find the answers you need in seconds
- Quickly access job contracts so you know exactly what you're getting paid to do
- Job options, extras, and material counts ensure accurate material pull sheets
- Profit and loss reports are calculated using invoiced totals and accurate material and labor costs

Estimating Solutions

- Manage a large volume of bids, update costs, and send accurate materials to the job site
- Produce a high volume of estimates using bid cloning and template tools
- Choose whether a bid is revised for new jobs, or jobs already in progress
- Material pull sheet data comes from one source, ensuring accuracy
- Specifications are stored in one place and seen throughout the entire build cycle of a job
- Easily update parts to feed current costs to profit loss reports. Quickly compare jobs costs to original bid

Mobile Capabilities

- Bolt's native mobile app provides you with greater control over your jobs from start to finish
- Maintain access to the mobile app even in areas of low to no cell coverage on your smartphone or tablet
- Manage your schedule, track your time, and update job details on-the-go
- Access essential information such as job schedules online and offline
- Work in Bolt's mobile app in Spanish or English, depending on the language you select on your mobile device

Integrates with Popular Builder Portals and Software Solutions

	Integration	Benefit
D·R·HORTON *America's Builder*	Bypasses the VendorSuite portal so that Bolt customer can receive scheduled data and purchase orders from D.R. Horton.	A Bolt customer no longer must log in to VendorSuite and can use Bolt to manage their entire business as well as interact with multiple builders.
MarkSystems	Bypasses the ITK (Internet Toolkit) portal so that the Bolt customer can receive scheduled dates, purchase orders, documents, and more from a builder using MarkSystems.	A Bolt customer no longer must log in to ITK and can use Bolt to manage their entire business as well as interact with multiple builders.
ADP	Allows you to manage your Bolt users directly from ADP instead of doing it in multiple places.	When you hire an employee in ADP, it will get added to Bolt without you having to do anything. In Bolt, you can then invite that employee to Bolt, and when you terminate the employee in ADP, it will inactivate that employee in Bolt.
intuit quickbooks	Allows you to create QuickBooks jobs and invoices directly from Bolt.	Prevents double entry errors and saves time.
sage 300	Allows you to create jobs in Sage Project Management Module.	Prevents double entry errors and saves time.
V Spectrum	Allows you to create Spectrum jobs and invoices directly from Bolt.	Prevents double entry errors and saves time.
