

What Our Customers Are Saying:

“ MarkSystems is much better; it’s structured. It puts the ordering in sequence so sales can check the boxes in the system. The ITK displays all the information you need. It shows any changes made to all the key people in real time.”

Ken Gill
Estimator, *Southern Development Homes*

“ The Job Start function is great. Right from the dashboard, we send vendors a Job Start alert, so they know they have a new job, and the PO and all the documentation is easy to find. It also allows two-way communication so vendors can notify us through the system if they can’t work”.

Bryn Hitchcock
VP of Purchasing, *Chesapeake Homes*

“ It gives our superintendents and trade partners online access to everything they need to know about a particular house or project. It’s all instantly available in real-time via smartphone, tablet or laptop.”

Bill Agee
Controller, *Gumenick Properties*

“ We had so many separate schedules and spreadsheets, while needing to connect with everyone. MarkSystems gives us one central location with all the information, and we don’t have to worry if it is wrong or updated since it easily updates automatically.”

Ryan Delin
CFO, *Integrity Group*

“ Anyone can sell houses. It’s making money at it that counts, and MarkSystems enables us to do that consistently. The affordable market lets us leverage our efforts.”

Wayne Laska
Principal, *Storybook Homes*

“ Information that used to be hard to track down and trickle through the company now flows seamlessly with MarkSystems. And the fact that it’s cloud-based and accessible at any time, from anywhere there’s an internet connection, has been huge.”

Grace Badham
Service Coordinator *Neilcorp Homes*
