EVERYDAY CLEANER

Superstratum Everyday Cleaner (300ppm) is a powerful nature-derived cleaner made using only salt, water, and electricity. This unique combination destroys mycotoxins with the performance of a professional strength cleaner and none of the toxic chemicals.

GENTLE
around people,
pets, and plants.

**DESTROYS
MYCOTOXINS**
by binding to and
oxidizing them.

**EXTRA
STRENGTH**
safe to use on
all surfaces.

What is Hypochlorous acid?

Hypochlorous Acid (HOCl) is a compound produced naturally by the human body. Our chemists replicated it outside of the body by running an electrical charge through only two ingredients - salt and water.

Unmatched Performance

This is the world's first product proven in a lab to denature and destroy mycotoxins on surfaces and remove them from the air. The Superstratum Everyday Cleaner is 250x more powerful than bleach as a cleaner - and safe enough to use around people, pets, and plants.

The Superstratum Everyday Cleaner is part of the full Superstratum System; a comprehensive solution for eliminating mold and mycotoxins, and a guaranteed water-resistant prevention against the return of mold.
