

BISON'S PEDESTAL DECK SYSTEM IS FIRST TO RECEIVE ICC-ES APPROVAL!

TRUSTED NAME.

What does this mean?

Architects can confidently **SPECIFY**; Code Officials can verify and **APPROVE**; and Contractors will **INSTALL** Bison Products with the evidence, knowledge, and confidence that Bison Deck Support Systems have been recognized and comply with the provisions of State/Regional Building Codes.

PROVEN PERFORMANCE.

What is ICC Evaluation Service (ICC-ES)?

ICC-ES is an accredited, nonprofit, limited liability company that performs technical evaluations of building products, components, methods, and materials. Reports include verified testing and technical information on approved systems and are available to the public. ICC-ES evaluates the most comprehensive testing of products within the industry for wind uplift, seismic, and fire. (Bison's ICC-ES report is ESR-2884P.)

SPECIFY BISON WITH CONFIDENCE.

Who uses evaluation reports?

Building officials, building departments, and building inspectors in the field use ICC-ES evaluation reports to make it easier to determine products' compliance with code. These reports are also used extensively by architects, engineers, contractors, specifiers, and others in the building industry to ensure products and systems meet building-code requirements. **Scan the QR Code on the left.**
