

Muddskip

Product: Muddskip is a product that can be purchased as an additive, which you add to existing dry or premix drywall compounds converting them into a one day process wall finish that **saves exponential time, money and labor**. Muddskip is **changing the process** of wall finishing as we know it today. **No more sanding, no more long dry times with same day multi step finishing capability**, you can even **ROLL** it on with **simple paint roller**. Muddskip allows you to apply over several substrates (existing surfaces) without a bonder and obtain the desired finish you choose, whether that be up to a level 5 smooth, skip trowel, texture, knock down, orange peel or a modification of your own. **Never before has there been a product that allows you to layer over layer without extensive dry time with no sanding.**

As easy as 1-2-3 Mix - Apply Base Coat - Apply Finish Coat. Get a level 5 smooth coat finish in ONE DAY with NO Sanding mess, ready for paint in a day or finish to your desired texture.

This revolutionary product allows anyone ease of use in applying existing drywall mud to a wall, transforming the finish with less time, no sanding mess and a beautiful, durable finish much like you would get with professional plaster products. The capability to act like plaster but applies easily over drywall or other existing substrates in ONE DAY with No Sanding Mess. Professional's love this product as its substantially less laborious, saves exponential time and prep as there is no sanding involved. Even a novice or first time applicator can obtain a professional finish!

Muddskip transforms existing drywall mud to perform like a lightweight plaster finish that anyone can apply easily in one day without sanding. Whether you are looking for a smooth finish, a textured finish like drag plaster, skip trowel, stucco, or a simple orange peel, this product offers the ease of use to obtain your desired look in a fraction of the time traditional products would take to perform desired finish and with no sanding mess and long dry time between coats.

The fact this product can be ROLLED onto walls with a simple paint roller allows for extremely simple application process or you can use the traditional hawk and trowel or pan and knife application methods. Muddskip saves from 30-65% labor time depending on skill level and humidity.

Saves on Labor with wet on wet coats same day
