Computer Presentation Systems: FieldConnect Mobile for Construction Scheduling and Collaboration on the Jobsite!

Sacramento, CA – January, 22 2013 - Homebuilders interested in joining the *"tablet revolution"* are turning to CPS' **FieldConnect Mobile** for anywhere/anytime construction scheduling – improving their carry rates and decreasing cycle times. **FieldConnect Mobile** is fully cross-platform compatible: iOS or Android; smartphone or tablet.

FieldConnect is a thin client, browser-based construction scheduling application – offering software as a service ("cloud" computing, in other words). Every authorized user within a homebuilder's organization has immediate access – via desktop or mobile device – to schedules, trade partner information, recalculation requests plus punch items and safety assessments.

Troy Warr, CPS' Product Development Specialist, says "Builders want their Field Managers to be able to utilize *any* smartphone or tablet (whether iOS or Android-based). And, they want them to be able to take advantage of the device's features – such as cameras and voice recognition."

Warr continues, "**FieldConnect Mobile** enhances the ability to reach out to trade partners – particularly punch list and safety assessment functionality. Field Managers, using their smart phone or tablet, are able to record punch items and notify subcontracts 'on demand' via email. And, Field Mangers appreciate being able to pull-up buyer and vendor details as well as selected options/upgrades – right on the jobsite."

Robert Musa, CPS' President says, "Homebuilders recognize **FieldConnect**'s strengths – anywhere/anytime access via the Internet, lot-by-lot scheduling, phase building support when needed, recalculation options and extensive reporting. Adding the cross-platform **Mobile** makes the product not only more useful, but *more available* as any iOS or Android device can be used."

Musa continues, "We were honored in 2012 when **FieldConnect Mobile** was selected as a **Constructech Top New Product**!"

Computer Presentation Systems is a leading provider of sales, marketing, construction and warranty/customer service software solutions to the new home industry. Founded in 1985, CPS has developed a reputation for innovative, cost-effective software solutions backed by outstanding service and support.

CPS will be at the 2013 International Builders' Show, **Booth C2860** in the nextBUILD section.
