

# Sliding Door Hardware is Here!

## SDH1 - Opening New Doors

Sliding Door Hardware, also commonly referred to as Barn Door Hardware, is a luxurious space-saving alternative to traditional hinged interior door hardware. Turn a shared space into a partitioned sectional with an easy-gliding door divider, or open up real estate otherwise reserved for a swinging door radius to add extra usable work or living space. Or just give your space a decorative rustic feel with an elegant twist to spice up the decor. Given the custom nature of this completely custom application, it can be used in virtually any environment. For interior doors only.

See all our components for kitchen, bath, office and computer furniture, on our [website](#) or in our full-color catalog. To request a free catalog or CD, please visit our [website](#) or call us.
