### **Stiletto® Brings User-Driven Innovation to New Carpenter Square Lineup**

As the premier brand of professional hammers on the market, Stiletto® expands into the squares market with three highly specialized measuring squares designed for professionals within the carpentry space. The new lineup includes two 7" carpenter squares designed with more layout notches to help users build and level faster, while their new 4.5" trim square is designed for precision and efficiency.

"During our field research, users consistently expressed the need for a precise and robust square that offers enhanced layout markings and specific notches catering to both rough and finish carpentry," explains Jenny Murphy, Product Manager for Stiletto. "The user research highlighted recurring issues such as insufficient notches, small cutouts, and coatings that gradually deteriorate. This feedback drove us to engineer Stiletto squares with unique features, offering carpentry and remodeling professionals unmatched measuring square solutions that rise to the challenges of their demanding jobs."

#### **Stiletto 7" Carpenter Square and 7" Carpenter Square with Level**

The Stiletto 7" Carpenter Square and 7" Carpenter Square with Level are designed with more layout notches to help framing carpenters and remodelers build and level faster. Both carpenter squares feature additional notches to aid in stud layout, ripping boards, and marking rafter pitches. The BOMBER™ Cutout allows for repeatable stud measurements of 1-1/2 inches, 3 inches, and 4-1/2 inches, as well as LVL measurements of 1-3/4 inches and 3-1/2 inches. The bottom heel markings provide users with marking versatility at the most common lumber measurements. The

7" Carpenter Square with Level also features a replaceable 180° vial. These specialized carpenter squares are fully machined and engineered with the most durable coating featuring an anti-glare, hard coat anodized finish.

### **Stiletto 4.5" Trim Square**

The Stiletto 4.5" Trim Square provides versatility for carpenters and remodelers, designed for precision and efficiency. The trim square tool features additional scribe holes to aid in laying out common angles, ripping boards, and setting saw blade height, allowing users to work efficiently while on the job. The ¼ inch and 3/16 inch reveal gauges aid in trim layout on door and window casings, while the bottom heel ruler provides easily identifiable height measurements for setting saw blade and drill bit heights. The 4.5" Trim Square is fully machined, with the most durable coating featuring an anti-glare, hard coat anodized finish.

### **Stiletto Squares**

Stiletto 7" Carpenter Square with Level	\$99.99
Stiletto 7" Carpenter Square	\$84.99
Stiletto 4.5" Trim Square	\$74.99

### **About Stiletto**

STILETTO®, founded in 1849, is a leader in the premium hand tool industry. STILETTO® is synonymous with the titanium hammer of choice for thousands of building professionals around the globe. The company introduced iconic new-to-world features like the side nail puller and magnetic nail starter that have now become industry standards.

STILETTO® is driven to define the future of hand tools by bringing breakthrough innovation and highly specialized features for carpenters, framers, and remodelers unlike anything else on the market.

STILETTO® is a division of Brookfield, Wisconsin-based Milwaukee Electric Tool Corporation. For more information on the full line of STILETTO® products, please call 1-800-987-1849 (USA/CAN) or visit [www.stiletto.com](http://www.stiletto.com).
