

3D Estate, a leading technological company specializing in 3D technology for the real estate sector, offers innovative interactive solutions for property presentations, promotions, and sales. Their range includes 3D virtual tours of apartments and interactive 3D Twin models showcasing entire property developments.

Their groundbreaking proprietary technology has transformed the approach to showcasing real estate investments. With automated 3D tour production, over 300,000 apartments have benefited from virtual tours. Studies indicate that 72% of surveyed individuals find these tours helpful in understanding apartment layouts, aiding in property evaluation and purchasing decisions.

Moreover, 3D Estate introduced the pioneering 3D Twin model, presenting complete developments, surroundings, and individual apartments. Accessible online across all devices, this innovation operates in seven markets, covering almost 300 investment projects.

As the largest provider of 3D materials for developers, 3D Estate's creation, 3D Twin, offers a 360 apartment search, virtual tours, and detailed 3D renders. Available at an affordable subscription rate for all digital devices, their Unreal Engine-based digital ecosystem provides a lifelike online property experience. The high-quality graphic representation of investments has led to increased interest and a surge in potential buyer leads during the online browsing stage. Additionally, viewers have the flexibility to explore apartments in up to 10 different interior design styles.
