

FOR IMMEDIATE RELEASE

Introducing the Sapphire Sky Pergola: A Revolutionary Patented Design Transforming Outdoor Living Spaces

Ann Arbor, 1/1/2024 — Today marks the unveiling of the Sapphire Sky Pergola, a groundbreaking innovation in outdoor architecture that redefines the traditional pergola experience. Developed by industry veteran Mark Hire, with 40 years of construction expertise, this pergola introduces a patented and unparalleled dual rafter movement, setting it apart as the only one in the world that mimics the true aesthetic of a pergola.

Key Features of the Sapphire Sky Pergola:

1. **Dual Rafter Movement:** The Sapphire Sky Pergola introduces a patented dual rafter movement that faithfully replicates the classic look of a pergola while offering unmatched functionality. This unique feature allows for 100 to 300% wider rafter spacing compared to any other louvered cover on the market.
2. **Rain and Shade Protection with a Push of a Button:** Experience ultimate convenience with the Sapphire Sky Pergola's ability to provide rain and shade protection at the push of a button. The adjustable louvers allow users to effortlessly control sunlight exposure and create a fully enclosed and sheltered space during rainfall.
3. **Customization Options:** Choose from four elegant colors and explore a myriad of customization options to tailor the pergola to individual preferences. Options include ceiling fans, LED lighting, speakers, curtains and screening, top screening, and the flexibility to use any type of post.
4. **Innovation Millennia in the Making:** The Sapphire Sky Pergola represents the innovation that the pergola has been waiting for, bridging the timeless aesthetic appeal of a true Roman pergola with the modern demands of comfort and versatility.

Mark Hire, the visionary behind this groundbreaking design, expressed his motivation: "I have always liked the look of a pergola as it adds a lot of Dimension to a space. However, it offers very little shade protection and no rain protection. So, I decided to change that."

The Sapphire Sky Pergola is poised to revolutionize outdoor living spaces, offering a perfect blend of classical charm and contemporary functionality. With its patented dual rafter movement, wider spacing, and a range of customization options, this pergola promises to be the go-to-choice for those seeking a transformative outdoor experience.
